## Drone attack saudi arabia oil fields

The opinions expressed by the participants of the entrepreneurs are their own. You are reading Entrepreneur of the Middle East, an international media entrepreneur franchise. In a move that could lead to key changes in the region's economic prospects, Saudi Arabia reportedly plans to create the largest fund on earth, worth more than \$2 trillion, to help reduce its dependence on oil. The plans for a sovereign wealth fund were announced by Saudi Arabia's Deputy Crown Prince Mohammed bin Salman during a five-hour conversation with the Bloomberg news organization in Riyadh, in an interview that covered issues such as the Saudi Public Investment Fund (PIF), the proposed IPO of the country's energy supplier Saudi Aramco and other topics. The Prince also said that they are pushing for an IPO of Aramco as early as 2017, and they expect to scale the PIF fund as soon as Aramco becomes public. The goal is to diversify revenues. Therefore, the IPO'ing Aramco and the transfer of its PIF shares will technically make the investment a source of revenue for the Saudi government, not oil, Prince Salman said. The Prince also said that the transfer of shares of Saudi Aramco PIF will ensure that within 20 years Saudi Arabia was an economy that is not dependent mainly on oil and has pIF profits and other sources of income. Without disclosing investment opportunities for PIF, he said they were referring to investment opportunities both inside and outside Saudi Arabia to capitalize and ensure profitability. In the recent past, Saudi Arabia has unveiled a slew of austerity measures to cope with falling oil prices, which includes new taxes and cuts to subsidies. Referring to other ways in which the country hopes to increase its non-oil and gas revenues, Prince Salman said that proposals to impose taxes and fees on luxury goods, fizzy drinks and energy drinks and restructuring subsidies are all in the reckoning. He also noted that the country is working on a program similar to the Green Card system in the United States for expats. According to a transcript of the conversation published by Bloomberg, Prince Salman said that by 2020, our revenues exceeded \$100 billion. In 2015, we quickly repaired our non-oil revenue by 35%. This year we are trying to put up more than 25 billion dollars, he said. Referring to Saudi Arabia's position on the oil production freeze, the Prince stated that Saudi Arabia would agree to freeze oil production provided that all other producers, including Iran, Russia, Venezuela, OPEC countries and others, decide to do so. According to a recent report in The Wall Street Journal, for the first time in several months, banks have slightly raised their oil price forecasts, while remaining cautious about forecasts Oil. Banks are seeing international oil prices benchmark Brent crude averaging around \$40 a barrel this year, and West Texas Intermediate, the U.S. oil benchmark, is averaging \$39 per barrel. Related: Oil price A's fall Complicating the global economy, according to NBAD OGI's earnings report for the period ended December 31, 2020. Splunk Inc. (NASDAQ: SPLK), a provider of the Data-to-Everything platform, announced new research in collaboration with Censuswide regarding European businesses and consumers to data from during the pandemic. We will remove this and make the necessary changes. quantum computing and supercomputers are revolutionizing VANCOUVER technologies, British Columbia, January 12, 2021 (GLOBE NEWSWIRE) -- Madison Pacific Properties Inc. (company) (TSX: MPC and MPC.C), a Vancouver-based real estate company announces results for the three months ended November 30, 2020. For the three months ended November 30, 2020, the Company reported a net profit of \$3.7 million (2019: \$8.1 million); cash flows from operating activities to non-cash operating balances of \$2.2 million (2019: \$3.5 million); and earnings per share of \$0.06 (2019: \$0.13). Net income includes net profit after tax from adjustments to the fair value of investment properties of \$1.3 million (2019: \$5.2 million). The company currently owns about \$608 million of investment and experience real estate, including a proportional share of the Company's ownership of joint partnerships. The Company's investment portfolio includes 52 properties with approximately 1.83 million rental sq m of industrial and commercial space and a 50% stake in 54 multi-family rental properties. Approximately 98.9 per cent of the available space in industrial and commercial investment properties is currently leased. The company's property development includes a 50% stake in Silverdale Hills Limited Partnership, which owns approximately 1,389 acres of undeveloped residential designated land in Mission, British Columbia. Approximately 38 acres of these residential land in the Mission are currently under development as townhouses and single-family plots for sale. The COVID-19 pandemic continues to cause economic shocks, and it is difficult to predict the duration and extent of the pandemic and whether it will have any long-term impact on the Company's business. Currently, the company occupies a good position, with a diversified portfolio of revenues of industrial, office, retail and multi-family rental assets. Approximately 81% of the Company's commercial investment properties are located in British Columbia, where the provincial government has various social fees and business restrictions. The company has provided some short-term rent deferrals and rent benefits, including rent exemptions under government assistance programs, for some tenants who significantly affected by the COVID-19 pandemic. As of November 30, 2020, the deferral of rent was \$500,000, and This is an uncertain and difficult time and management will continue to monitor business development and market conditions and any impact they may have on the business. To consider the risks and uncertainties to which the Company is exposed, see its recently filed annual and interim MD-A. The Company is also pleased to announce that dividends of \$.0525 per share for each of Class B common shares and Class C voting shares will be paid to shareholders on February 23, 2021 on February 9, 2021.

Dividends are considered appropriate dividends for tax purposes. V5Y 1L1Major in building wireless market players include CommScope, Ericsson, Huawei Technologies Co., Nokia Corporation, CTE CorporationSelbyville, Delaware, January 12, 2021 (GLOBE NEWSWIRE) -- According to the latest report in-building Wireless Market by Component (Infrastructure, Service), Deployment (Urban, Rural), End User (Commercial, Healthcare, Industrial, Government, Residence), Regional Perspectives, Price Trends, Competitive Market Share and Forecast 2026, by Global Market Insights, Inc., the market valuation in wireless construction will cross \$20 billion by 2026. The growing demand for improved construction coverage and the need to reduce indoor connectivity costs are expected to contribute significantly to the growth of the market. Growing demand for a reliable network connection throughout the property, across the property is projected to support market demand. The enhanced ability to support multiple applications at the same infrastructure level supports the introduction of wireless solutions. In the construction of wireless solutions, the function of distributed antenna structures to transmit wireless signals to the carrier throughout the facility. Construction companies use wireless solutions in construction to meet the changing demands of customers and provide significant property value. The request for sampling of this study report - microcellular infrastructure segment in the wireless construction market will demonstrate a growth rate of about 10% until 2026. Microcells are effective within a 1 mile radius and require a power level of 10 W. These systems are deployed at a relatively smaller facility and act as mini-cell towers. These towers cover an area of about 25,000 sq m, and provide a reliable indoor signal coverage. For microcells to work effectively, they must be integrated with a broadband Internet network. In building a wireless market for support and service estimated to reach CAGR of 10% by 2026. Companies accept maintenance services to ensure quality of service efficient operation in the construction of wireless infrastructure. With the development of technology, construction companies are working with service providers to support infrastructure development and implementation at construction sites. This helps building owners deliver effective performance in the construction of wireless devices such as DAS, small cells, etc. Recognition in the construction of wireless solutions on urban infrastructure facilities is constantly growing due to the need to expand network services. Urban infrastructure consists of stadiums, city streets, airports, railway stations, etc. The need to manage efficiently the expected unloading of traffic is projected to stimulate demand for wireless solutions in construction. The end-use industrial segment is expected to hold more than 25% of its wireless market share by 2026. Modern industrial facilities consist of state-of-the-art sensor devices, machinery, vehicles, etc. They also provide quality of service and improve the productivity of the entire industrial infrastructure. Several companies operating in the market, such as Nokia Corporation and Cisco Systems Inc., are helping businesses integrate wireless systems into construction and IoTs.Europe's wireless market will account for 20% of revenue by 2026 contributed to extensive digitization and expansion of telecommunications infrastructure. In addition, in response to the COVID-19 crisis, companies of various industry verticals instructed their employees to work from home. In May 2020, according to a report by the French Ministry of Labor, about 25% of workers in France were working remotely from home by the end of March. Given the figures, the need to provide orderly cellular communications in housing enterprises will fuel the demand for wireless solutions. Request to customize this research report - players working in the market, CommScope, Ericsson, Huawei Technologies Co. Ltd., Nokia Corporation, UTE Corporation, etc. Companies working in the market, are focused on the development of advanced infrastructure frameworks. Some of the key findings in the construction of the wireless market report include: - The extensive need for higher data speed bandwidth for enterprise applications, such as teleconferences in the construction environment, supports the development of technology in the market. North America is poised to occupy an important share in the industry for infrastructure solutions spurred by a broad presence of technology enterprises. In Europe, favourable government initiatives to Internet infrastructure and widespread digitization are planned to help expand the market. The Zurich-based XR startup is establishing its presence in Southern California to expand distribution, licensing and talent relationships; Mictic music bracelets and software will launch in the second quarter of 2021. Mictic is a wearable musical instrument coming in 2021 with popular musical instruments built in, such as guitar, piano, drums and strings, as well as genre soundscapes such as EDM, old school hip hop, traps and metal. Mictic bracelets communicate with the user's smartphone via Bluetooth, allowing gestures to be translated into musical tones, textures and sound effects in real time. More information mictic.com Mershad Javan, CEO of the Zurich-based company Mictic AG, which will bring its wearable musical instrument to market in June 2021. The startup is opening an office in Los Angeles to further develop partnerships with the music and entertainment industry. Javan previously founded startup Octive in Southern California. READ MORE at mictic.comLos Angeles, CALIFORNIA, January 12, 2021 (GLOBE NEWSWIRE) -- Mictic AG, the Swiss startup behind a new, exciting, wearable music instrument, has opened an office in Southern California to maximize relations with the heart of the entertainment and technology industry. The Augmented Reality (XR) experience is the perfect tool for artists of all skill levels, from stars looking for the next way to excite fans at arena-sized concerts to teens TikTok going viral. The new Santa Monica office will expand ties with distributors, talent and other partners in the music industry, Hollywood, social media and technology. Mictic uses Swiss ingenuity, design and precision to create an incredible experience, said Mictic AG CEO Mershad Javan. Now it's time to connect this technology with Los Angeles artists and influencers, and build a base for our further discussions with major technology partners. Javan was located in Zurich with Mictic after years in the Orange County, California startup scene that included the successful sale of digital music distribution giant MondoTunes known as Octive) at Anakando Media Group. MondoTunes has managed to establish its reach through strategic partnerships with Universal Music Group, China's Tencent and other companies. Now Javan will split the time between Switzerland and California and build Los Angeles. Los Angeles. including Mictic's marketing and customer service departments in the United States. Mictic bracelets communicate with the user's smartphone via Bluetooth, allowing gestures to be translated into musical tones, textures and sound effects in real time. It is the only wearable device that is an actual musical instrument, not an instrument to control instruments. The moves are easy to master for beginners and present inspirational challenges for professionals. Invented by Rolf Ellat, the product is expected to go on the market in June 2021, with popular musical instruments built in such as guitar, piano, drums and strings, as well as genre soundscapes such as EDM, old school hip-hop, trap and metal. New instruments and sounds, including those developed with partner artists and brands, will be added through frequent product updates. Javan will also talk about wearable devices and the music industry through VR at the CES partner DreamlandXR Music Conference, technology and gaming AltSpace event on January 14. (More here.)
